CLIMATE

WINTER IN AZAMGARH(MY FAVOURITE)

Winters in Azamgarh see very large variations, with warm days and downright cold nights. Cold waves from the Himalaya region cause temperatures to dip across the city in the winter from December to February and temperatures below 5 °C are not uncommon. The average annual rainfall is 1,110 mm. Fog is common in the winters, while hot dry winds, called loo, blow in the summers. Recent years, the water level of the Tamsa has decreased significantly.

The last thing is about Fruit which is famous in Azamgarh:
SINGAHADA

SINGADHA

The funniest thing about the whole vacation is 'When I was returning from Village, I was holding a BIG SACK which is full of Singadha. And the same thing my whole family eat that, but I don't. 😂 People eat this in two ways first without boiling and second after boiling.
